3. WHAT WE COULD HAVE MADE

Scenario	1320	5110	Total
Actual	-2.21	-3.27	-5.48
Ideal	+16.50	+15.18	+31.68
With fees	+15.54	+14.26	+29.80
Difference	+18.71	+18.45	+37.16

4. WHY WE LOST

1320:

- Round 1: Sold at 56.40 vs entry 56.80 (**-0.40 loss**)
- Round 2: Sold at breakeven 56.30 (**0.00**)
- Round 3: Sold at 56.45 vs entry 56.30 (**+0.15 profit**)
- **Problem:** Exited too early, missed move to 57.40

5110:

- All 3 rounds sold below entry price
- **Problem:** VWAP breakdown exits triggered before profit

Root Causes:

1. **VWAP breakdown exits** — too sensitive, exit too early
 2. **No trailing stop** — gave back profits
 3. **Multiple round trips** — increased fees (1.88 SAR)
-

5. RECOMMENDATIONS

1. **Use trailing stops** — capture more profit
 2. **Widen VWAP threshold** — avoid premature exits
 3. **Reduce round trips** — fewer trades = lower fees
